

Our medical AI group at Northwestern University is now accepting Remote/Onsite Research Student to work on **medical imaging AI projects**. The student will be directly supervised by the PI for conducting an AI research project. The student can expect to receive comprehensive training on deep learning, medical image analysis, and medical imaging physics, and paper writing.

Competitive student candidates will be considered for the graduate program at Northwestern Biomedical Engineering.

**Qualifications**

- A current undergraduate or master student in Computer Science, Biomedical Engineering, Electrical Engineering, Medical Physics, or other quantitative related fields. Prior research experience in deep learning and computer vision is a plus.
- Proficient in programming languages such as Python and Matlab is a plus.
- Highly self-motivated with good communication skills.

If interested, please email up-to-date CV to Dr. Bo Zhou ([bo.zhou@northwestern.edu](mailto:bo.zhou@northwestern.edu)). Please use email title: “*Prospective Research Student – Northwestern – YourName*”.
